MODELS 1490 AND 1491

This combination unit is very popular with those who need both cash and record protection or those who need to keep an excessive amount of coin. The upper compartment of Model 1490 is a Class "F" Money Safe for the protection of currency. Its deep interior provides space for considerable amounts of paper money. The lower compartment is similar to a record safe and may either be used for records, rolled coin or a combination of both.

Model 1491 has an inner partition which forms a hold-up resistive compartment in the rear of the chest. At the top of the partition there is a slot through which excess cash may be deposited. The partition door has a lock which requires two keys to open. With one key off the premises, the owner cannot be forced to open the inner door.

MODELS 1482 AND 1483

An excellent unit for Route Sales, Super Markets, and Discount Stores. 1482 and 1483 equipped with key locking dial on receiving chests. Inner Depository Hopper is key controlled.

MODEL NO.	OUTSIDE DIMENSIONS			INSIDE RECEIVING CHEST			DOOR OPENING		UPPER CHEST			LOCKER			DOOR OPENING		Weight
	High	Wide	Deep	High	Wide	Deep	Deposit	Receiving	High	Wide	Deep	High	Wide	Deep	Inner	Outer
