GENERAL SPECIFICATIONS

MAJOR Safes Rectangular Door Chests are constructed strictly according to the "BURGLARY MANUAL SPECIFICATIONS" and are highly burglary resistive, more so than ordinary record safes. These chests may be installed in concrete blocks, steel containers filled with concrete, or in walls in basements. All are equipped with Sargent Greenleaf Combinations Lock with a Relocking Device, protected with a hard plate to prevent drilling. Walls are 1/2" solid thick steel, Door—1" solid thick steel, thickness as required by the Insurance Burglary Manual to meet the Rating Specified.
