MOSLER SAFE

THE BEST PROTECTION FOR RECORDS AND CASH

Many firms unknowingly are gambling with the very life of their business by storing business records, accounts receivable and other vital documents in unsafe safes and cabinets. Thousands of firms throughout the United States have found out too late that loss of records can mean business failure. The leading firm is out of every 100 firms that lose their records by fire go out of business.

The only true test of a safe is actually submitting the unit to intense heat and impact under conditions simulating an office fire. All Mosler Safes are tested for endurance to fire, impact and explosion, the independent Underwriters Laboratories Inc. and are labeled accordingly.

Check your present safe today. Look for the Underwriters' label. If your safe doesn't have the label, you should first to call Mosler today, stop gambling with your business and get
