

Mosler's TL-15 Square Door Money Safes range from the ER80812 size to the large ER572420 size. They are available "bare" or in clad concrete blocks for increased burglar resistance. All feature Group 1 RMR302 combination locks, with both thermal and mechanical relocks. Smaller sizes use 3/4" high tensile steel doors. The ER80816, ER111116 and ER161616 models are available in clad blocks of identical width and depth as the popular ER282420 to allow easy stacking with each other and an assortment of other comparably sized units. Inner doors, deposit slots, additional locks and time locks, inner compartments and a host of other interior accessories are available to assure meeting any cash storage and cash handling requirements.

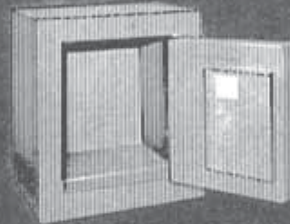

All Mosler TL-15 Safes are Underwriters Laboratories listed and have passed the stringent UL tests. Standard color is textured Parchment with seven optional colors also available. Bases and anchoring stools are available. An Interlock prevents damage to the bolt mechanism by keeping the bolts recessed while the door is open on all larger models.

TL-15 is synonymous with ER and BR insurance ratings.

TL-30 Rectangular Door Money Safes offer a variety of sizes and tool-resistant Supergard in various parts of body and door. Large interior space allows easy customizing with optional modular components.

## Standard Combination Units

## Rectangular Door Money Safes

Standard drill-resistant plates, Group 1R combination lock, automatic relock, heavy bolts, and automatic bolt lock. Twelve standard colors, with left or right opening door. Optional interior components, locker doors, and time locks. F insurance rating, and G rating on bank policies.

TRTL-30 Rectangular Door Money Safes use Mosler's exclusive A-101 body construction with Supergard inner bodies. Features UL listed Group 1 lock with integral thermal relock and mechanical relocking device. Optional shelves, interior lockers, and time locks. Insurance H rated, and G rated for broad form policies.
