Rotary Hopper Cash Depository

A cash collection and depository unit designed for use in cashier attended booth or similar attended applications.

SPECIFICATIONS

RECEIVING SAFE

receiving safes are standard dimension "C" label record safes modified for use as depository safes by providing an opening to accommodate the rotary hopper top. These modified units are manufactured in accordance with standard manufacturing procedures for "C" label safes, but are not labeled due to the modification to provide the necessary opening to accommodate the hopper top. Units are furnished without base or wheels and are complete with a fixed bin front and sponge rubber pad covering the floor of the unit which cushions the deposits.

ROTARY HOPPER TOP

The rotating hopper has a outside dimension of 6-1/8" high, 14-3/8" wide (19" over handle), and 9" deep. The inside dimensions is 12" long and 7" diameter. The opening is 4-7/8" by 12". The inner cylinder is rotated by means of a rubber grip handle, until this opening is in alignment of the upper opening in the outer body. The deposit is then made and the inner cylinder rotated until its opening comes in alignment with the opening in the bottom of the outer body, thus permitting the deposit to drop in the locker.

IMPORTANT

These units are modified insulated safes, and therefore afford minimal protection against burglary. Larger quantities of cash should not be stored in them overnight nor should they be used in unattended areas. Use Mosler 8RD series depositories for such applications.

OPTIONS

KEY LOCKING DIAL

Key locking dial knob to provide double custody requiring both combination and key to open unit. Tumblers disturbed when key is locked.

NOTE: When key locking dial is part of original order, a hold-up detour label will be affixed to the door of the unit and will contain the following wording: "Two Persons Required To Unlock Safe."

ANCHORING ARRANGEMENT

Anchoring stool and bolt to secure unit to floor - safe is factory prepared to receive anchoring stool and all necessary parts needed for installation are shipped with unit.

DEPOSIT BAG

When required, safe will be provided with hooks for hanging a bag specifically designed for application to this unit. This bag is of heavy duty canvas, complete with zipper top and ring for attaching padlock.
