SLS Challenger Range (US UL TRTL 15X6)

SLS Challenger Range

(US UL TRTL 15×6)

As the name implies this range of safe is designed to resist all forms of criminal attack including force, drills, thermic and mechanical cutting tools, as well as explosives. A truly 6-sided safe meeting the latest UL TRTL 15×6 requirements.

The special SLS zacalloy stainless steel casting covers the whole door area, giving in total a massive 3" protection.

The safe body incorporates both the zacalum composite casting and high strength wirand zacrete barriers totalling 3½".

Zacalloy Stainless Steel Door Casting with Superamics.

UL Test Engineer Attacking Door Jamb with Torch.

UL Combined Torch/Tool Attack.

Dual locking is standard incorporating a UL listed Group 1 manipulation proof combination lock, in conjunction with the unique and patented SLS Anti-Drill Keylock with detachable bits. Alternatively, two combination locks can be provided, as can provision for a timelock. (Not available size 2316.)

As a pioneer in sophisticated re-locking devices incorporating special glass plates and random routing of the protected wire, the variable positions of the devices themselves, substantially deter the professional criminal from even attempting an attack.

SLS is known for its massive bolt-work system, and this new range employs three-way moving bolt-work with fixed bolts on the hinge side of the door. The bolts engage directly into the safe body, thus creating an integral unit when the safe is locked.

◀ A wide range of shelves, drawers, cupboards etc., can be provided at additional cost. Locking of cupboards can incorporate time delay mechanisms.

The safe body is attractively painted in two shades of brown, with a centre facia panel across the middle of the door. ▶

Challenger (US UL TRTL 15 x 6)

A = Minimum dimension for drawer withdrawal
 B = Overall width with door open at 180°
 C = Overall depth with door open at 90°

ADD 2⁹/₁₆" FOR TOTAL DEPTH OVER HANDLE.

SLS reserve the right to alter the specification without notice in the interest of improving security.

All dimensions and weights are nominal.

As a matter of policy all heavy range safes are of similar external appearance and there is therefore no indication as to the likely value of the contents.
