

Schwab's "A" Label Record Safes (Class 350-4 hour) are available in six sizes to fit your exact storage requirements. Seven standard colors are available, and no matter which you choose, the beauty of your safe is enhanced by its color-coordinated escutcheon plate and contemporary handle.

"A" label record safes are equipped with a Group 2 key-change combination lock, and a U.L. approved relocking device to set the bolts if the combination lock is punched in a burglary attempt. Walls are 5 1/4" thick (doors, 5 7/8") constructed from heavy-gauge steel and special insulation.

A broad selection of attractive modular interior units, plus full-access door swing, make every inch of safe capacity functional and efficient. See the Record Safe Interiors Catalog for a complete description of the shelves, drawers, lockers and other interior components available with Schwab "A" label safes.

All safes on this sheet carry Underwriters Laboratories' Class 350-4 hour Label for fire endurance, impact, and explosion hazards; Safe Manufacturers' National Association Label for fire endurance, impact, and explosion hazards; and Underwriters Laboratories' Relocking Device Label. All meet Federal Specification AA-S-81b for Class A office safes.
