

### CERTIFIED PROTECTION

Fire-Files bear the Shaw-Walker Certified Protection and the Underwriters' Laboratories one-hour labels, your assurance that they have preserved their contents for at least 60 minutes at 1700° Fahrenheit. Many 2-drawer Fire-Files have saved their contents in severe fires. Page 168.

### Fire Protection at Home

Those papers you have in a metal box or dresser drawer will be gone in a few minutes if fire ever destroys your home . . . It's sheer folly to leave tax records, canceled checks, personal papers or valuables in your home without adequate protection now that you can buy this attractive, two-drawer Fire-File with certified one-hour protection. Finished in grained walnut or mahogany, the Fire-File makes a handsome piece of furniture. Fitted with caster base, it can be readily moved about.

## Two-Drawer Fire-Files®

Records placed in two-drawer desk companion files are usually of a vital nature. Essential to the individual's job, priceless to the uninterrupted continuance of the business, they need maximum security against fire and unauthorized entry. That's why all desk companion files should be Fire-Files.

The two-drawer Fire-File is now widely used in homes as well as offices. Providing the protection of a safe, it is better looking and more compact.

Can be equipped with caster base, combination lock or Wobble Blocks, page 173. Top drawer can be converted into a cross-file protecting up to 8000 cards, sizes 3x5, 4x6, 5x8, or 6x9—see page 175.

One-hour labels, heavy-duty Free-Coasting Slides, drawer latches, sliding followers, beautiful brushed aluminum hardware, finest lacquer finish, and Signal Plunger Lock controlling all drawers. (Locks not keyed alike unless specified.) Same in every detail as the 4-drawer Fire-Files, page 171.
