

# **TannVault TL-15**

PROTECTING THE PRICELESS SINCE 1795

**Six-sided Construction plus Superior Fire Protection**

**MODEL TDV-200**

**It is recorded** that the House of Tann were makers of ironclad treasure chests during the reign of King George II (1727-1760). In 1795, just outside of London, Edward Tann founded what is believed to be the world's first firm of safemakers, John Tann LTD. Two centuries of experience has taught Tann that the science of safemaking must continuously advance to keep a step ahead of the science of safebreaking. Safety, from fire and theft, is the final, the ultimate, the only test of a safe. There's no doubt about it, if you want world class protection for your valuables, the TannVault TL-15 is the best safe for you.

**UL LISTED** – Underwriter's Laboratories listed TL-15 burglary resistance label and manufacturers certified one hour fire label.

**COMPOSITE CONSTRUCTION** On all six sides. The massive four inch thick door and three inch thick walls incorporate a composite design using tough high-density concrete and steel matrix. This assures both fire and burglary protection.

**GLASS PLATE NERVE CENTER** Normally, only available on safes costing much more. When attacked, the glass shatters activating the relocking devices.

**LOCKS** A UL listed Group II combination lock is protected by two positive anti-attack relocking devices, triggered to engage when the safe is attacked. A secondary high security keylock adds convenience to daytime security in addition to nighttime burglary defense.

**LOCKING BOLTS** Massive 1.5 inch diameter locking bolts are cradled into individual sockets incorporated in the body design.

**OPTIONAL LOCK**  
UL Group II digital electronic lock with pushbutton pad is an optional feature.

**HINGES** The door pivots on adjustable ball bearing hinges providing years of dependable service.

**BOLT DOWN PROVISION** Models TDV-100 through TDV-400 are manufactured with an interior countersunk anchor hole for bolting the safe securely to the floor.

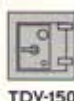

**INTERIOR** Adjustable shelves are in half-inch increments, and are complemented by a removable keylocking cupboard.
